

Solus Scientific opens operations in the USA

Mansfield, UK – August 1, 2018 Today Solus Scientific announced the opening of their first overseas operation, Solus Scientific Solutions Inc. in the USA.

The new US facility run by General Manager Brad Shouse will serve as a sales and customer service facility for the Americas market. Customers will benefit from local stock and expertise close on hand to provide support.

“The decision to expand our presence into the USA was a logical step in our business growth strategy. This is an exciting new chapter for Solus as we increase our ability to serve current and future markets,” said CEO Ray Wakefield.

Solus Scientific Solutions Inc is based out of Cincinnati, a location chosen as convenient to serve our growing customer base in the USA. “Cincinnati is in an ideal location for us with regard to current customers already working with Solus” says Wakefield.

ABOUT SOLUS™

Solus Scientific pathogen systems have been specifically developed with the constraints of a food testing environment in mind. Committed to food safety excellence Solus assays bring significant productivity benefits to the labs who employ them. Solus systems use proven, industry standard immunoassay technology that is easy to implement and use.

Founded in 2009 the Solus vision was to develop pathogen testing immunoassays with rapid time to result. The first dual enrichment pathogen kits completed AFNOR certification in 2013. Solus Pathogen immunoassays are manufactured within our UK production facility to the highest standards, which are tightly controlled within our ISO 9001 accredited quality system.
