**CULTURAL RESPONSE – tested in compliance to ISO 11133:2014/A2:2020**

The medium was prepared according to label directions, incorporating NCM4009 Ferric Ammonium Citrate and 10mL volumes inoculated with the organisms listed below. Cultures were incubated at 30 ± 1°C under aerobic atmosphere and examined for growth at 22-26 hours. Following incubation, 10µL was subcultured onto TSA at 37 ± 1°C and examined for growth at 22-26 hours or onto Harlequin® Listeria Chromogenic Agar (HLCA)\* at 37 ± 1°C and plates examined for growth at 40-48 hours.

\* Risk Categories as defined by the European Pharmacopeia.

\*\* Not Applicable. "Non-TSE-relevant animal species."

Product was tested in compliance to the regulation noted above. Where a regulation is not referenced, the manufacturers standard test methods were observed. Variances in data may occur. External factors such as adverse storage conditions or contamination of product may cause loss in performance. Solus Scientific Solutions Ltd certifies that this lot met all quality control specifications for this product.
