LM3.5 pH test method
LM3.6 Sterility test method
LM5.13 Quantitative performance testing of solid medium LM6.9
LM6.9 Qualitative inoculation of solid medium

Testing relates only to samples representative of the manufactured lot that have met the specification/acceptance limits on the date of approval.
The Uncertainty of Measurement relating to fill volume, pH and microbiological performance has been determined.
Cultures used for challenge testing are from approved culture collections and testing is performed as per the requirements for ISO 11133:2014/A2:2020
The information given above is believed to be correct, however, performance is only warranted when the medium is used according to manufacturer's recommendations.
